

## **Informed Consent**

### **American Journal of Traditional Chinese Veterinary Medicine Statement of Informed Consent:**

Animal owners (clients) and their animals have a right to privacy that should not be infringed upon without informed consent. Identifying information, including animals' names, initials or medical record numbers, should not be published in written descriptions or photographs unless the information is essential for scientific purposes and the animal owner gives written informed consent for publication. Clients must consent to all photographs of animals included in a manuscript. Pedigrees should not be published without signed consent from the involved breeders.

Identifying details should be omitted if they are not essential. If identifying characteristics are altered to protect anonymity, such as in genetic pedigrees, authors should provide assurance that alterations do not distort scientific meaning and editors should so note the changes.

## **Conflict of Interest**

Authors are expected to acknowledge all sources of funding or financial support and to disclose to the Editor-in-Chief any financial interests (including ownership, employment, consultancy arrangements, and service as an officer or board member) they have with companies that manufacture products that are the subject of their research or with companies that manufacture competing products. A conflict of interest statement will be included in the Acknowledgments section of a paper. Authors should identify individuals who provide writing assistance and disclose any funding source for the material.

## **Responsibilities and Disclaimer**

- Any statements expressed in the Journal are those of the individual authors and do not necessarily represent the views of the of the AJTCVM, the American Association of Traditional Chinese Veterinary Medicine (AATCVM), the American Academy of Veterinary Acupuncture (AAVA), the World Association of Traditional Chinese Veterinary Medicine (WATCVM) or the International Veterinary Acupuncture Society (IVAS), which take no responsibility for any statement made.
- References to a specific method, product, process or service made in an article do not constitute or imply an endorsement, recommendation, or warranty thereof by AATCVM, AAVA, WATCVM or IVAS.
- The materials published in the AJTCVM are for general information only and do not represent a standard of AJTCVM, AATCVM, AAVA, WATCVM, or IVAS, nor are they intended for use as a reference in purchase specifications, contracts, regulations, statutes or any other legal document.
- Although this is a peer-reviewed journal, neither AJTCVM, AATCVM, AAVA, WATCVM, IVAS nor any peer, individually makes any representation or warranty of any kind,

whether expressed or implied, concerning the accuracy, completeness, suitability or utility of any information, apparatus, product or process discussed in this publication and assumes no liability therefore.

- The information published in AJTCVM should not be used without first securing competent advice, with respect to its suitability for any general or specific applications.
- Any person utilizing information published in AJTCVM assumes all liability arising from such use, including, but not limited to, infringement of any patent or patents.
- With respect to all articles, works or other materials presented to the Editorial Board of AJTCVM, the AJTCVM reserves the right to alter or amend the presentation of an article to fulfill its journalistic needs and the risk of any claimed loss as a consequence of such action, omission, amendments or alterations by the AJTCVM editors is and remains solely upon those submitting the material for publication.

Sample statements to use in toto or revised and used as needed at the end of papers:
